

# Lifestyle<sup>®</sup> Domestic Wastewater Systems

Technical Guide WW 4

Hynds Lifestyle<sup>®</sup> Systems are a high performing range of aerated wastewater treatment systems for domestic applications that offer environmentally sensitive alternatives to the septic tank.

12.20 | WASTEWATER | WW04 LIFESTYLE DOMESTIC WASTEWATER SYSTEM

## Applications

- Residential properties
- Irrigation for landscaping
- Connection and upgrade of existing septic tank

## Product Attributes

- High quality wastewater treatment
- Genuine 24-hour emergency capacity
- Simple IP rated control and alarm system
- Quiet and economic operation

## Approvals/Standards

- Tested (OSET-NTP)

## Quality

- Manufactured to ISO 9001 Quality Standards

*We are the supply partner of choice for New Zealand's civil construction industry, specialising in water and infrastructure based solutions.*

# Hynds Lifestyle® Systems - The next generation of aerated wastewater treatment.

Hynds Lifestyle® Systems are high performing modular wastewater treatment systems, which can be designed for all domestic applications. The systems are designed to easily blend into the landscaped environment. They offer high quality treatment performance, low running cost, and can be maintained by Hynds approved local service agents.

## Hynds Wastewater Treatment Systems. Proven Submerged Aerated Filtration (SAF) Technology.

This tested and proven secondary treatment process produces a clear, odourless liquid suitable for irrigation of water to landscaped gardens, bushes or trees. The treatment system can be connected to your existing septic tank.

### Installation

The installation of a Hynds Lifestyle® System will be completed by an approved Hynds Installer. Installation of the treatment system and irrigation field is typically completed within one day.

### Design

Hynds wastewater treatment systems cater for all site conditions and household requirements. Each system's design includes an assessment of the local Council regulations, or consent conditions.

Your local Hynds approved Installer will provide a free site visit to determine the most appropriate location of the treatment system, landscaping, and drainage requirements, and on request can provide approval for council consent and a quotation for the appropriate Hynds wastewater system.

### Performance

The unique design of Hynds Lifestyle® System offers a level of performance unrivalled by traditional disposal methods. All Hynds Lifestyle® Systems are designed to exceed New Zealand Standards for disposal of wastewater and are guaranteed to meet the following criteria:

- BOD<sub>5</sub> <20
- Suspended Solids <30mg/L
- Ammonia <5mg/L
- >99% faecal coliform removal <10,000mg/L
- Total Nitrogen <15-25mg/L

### Servicing

Your local Hynds approved service provider can offer a service contract to ensure ongoing optimum system performance. Two visits per annum are recommended to ensure compliance with council rules. The service provider offers back-up support with each service contract.

## Which is the right Hynds system for your site?

### Hynds Lifestyle® Advanced

The Hynds Lifestyle® System is designed for an individual house. The treatment process is incorporated in a single precast concrete tank.

- Maximum daily flow of up to 1800L/day
- High quality treatment performance
- Maximum 1 house
- Number of tanks: 1
- Total tank capacity: 8500 litres
- OSET and BOP Catchment Approved

FIG. 1 Hynds Lifestyle® Advanced

### Hynds Lifestyle® Ultimate

The Hynds Lifestyle® 'Ultimate' System is designed for an individual house and offers excellent surge control for high occupancy with advanced performance. A large biological surge protection filter is installed on the outlet of the primary chamber.

- Maximum daily flow of up to 1800L/day
- Offers good surge protection
- Maximum 1 house
- Number of tanks: 1
- Total tank capacity: 8500 litres
- OSET and BOP Catchment Approved

FIG. 2 Hynds Lifestyle® Ultimate

### Hynds Lifestyle® Elite

The Hynds Lifestyle® 'Elite' System is designed to cater for the larger home, or two connected dwellings. This system offers an additional large capacity primary chamber which provides protection against surge flows that can adversely affect a systems performance.

- Maximum daily flow of up to 3000L/day
- Maximum 2 houses
- Number of tanks: 2
- Total tank capacity: 13000 litres
